"Fresh from the Gardens"

## The Holding Of Conferences

The holding of conferences has become such a common practice since the close of the Great War, and, considering the magnitude of world problems still calling for solution, so little has apparently been accomplished, that many people are inclined to question the utility of such gatherings and to be critical of the comparatively heavy expense which they entail. Within recent months, for example, there has been the international conference on disarmament held at Geneva, the Lausanne conference on war debts and reparations, the Imperial Economic Conference at Ottawa on preferential trade within the British Empire, and very shortly a world economic conference is to assemble at London, England. Are they worth while, and have they really accomplished anything, people are asking.

There are, of course, certain types of people who belittle all attempts to remedy evils and achieve reforms by way of negotiation and compromise. They predict failure for each conference in advance of its meeting, perhaps, in many cases, the wish being rather to the prediction, because they hold to the view that the existing financial and economic system of the world cannot be remedied but must be torn up root and branch, completely destroyed, and replaced by an entirely different system founded on new principles. Others, less radical, have seemingly lost confidence in the ability or willingness of the nations to abandon their extremely selfish nationalistic policies and programmes and work together for the common good of all.

While progress has been slow, and many of these conferences disappointing in the tangible results accomplished, it would be a great mistake to regard them as failures. For example, while the world still has a long way to travel along the road of total disarmament, it is travelling in that direction, as witness the real advance made in the limitation in the number, size, and power of naval craft to be maintained by the leading maritime nations. Disarmament can only be brought about by a restoration of confidence and trust among peoples; it is a matter of education and each conference held is a mighty factor in enlightening people's mind and stirring their consciences. Each such conference helps each nation to more fully understand and appreciate the viewpoint of other nations. And this is an essential first step to definite action.

Complete failure was predicted in advance for the Lausanne conference on war debts and reparations. Of course it did not achieve everything that was hoped of it. No conference ever does, probably never will. But the Lausanne conference did, as is now almost universally admitted, accomplish a great deal and take a long step forward towards the goal of a reasonable settlement of this most vexing problem which has been an outstanding obstacle to the world's restoration to financial and economic health.

Failure was likewise predicted for the Imperial Economic Conference at Ottawa. Whatever its accomplishments, and these will not be fully known until the details of the agreements signed are laid before the respective parliaments of the Empire, the conference did not end in failure. It failed of course to reach all the decisions that many people desired, and, on the other hand, it failed in the eyes of others because it reached decisions to do things not acceptable to them. Where so many conflicting interests had to be reconciled, and, failing complete agreement, compromises reached, it follows that what is regarded as failure by one interest or group is acclaimed as success by the opposing group, and vice versa. Success or failure are, therefore, comparative terms. The main thing is that each component part of the Empire now understands the position, problems and economic difficulties of all other parts as never before, and each has displayed a willingness to go as far as possible in solving those problems and overcoming those difficulties. That is all gain, and full of promise for the future. The conference really sounds the death-knell of extremist trade restrictionist policies and unlocks the door of freer and wider Empire trade. This must inevitably lead to freer and wider world trade.

Finally, those who are critical and skeptical of the value of these conferences will do well to remember that in olden days nations did not trouble very much to confer about their difficulties and strive to find a way out compatible with the dignity and interests of all; rather they were glad to find even the smallest excuse to wage war on each other. The world is turning away from that barbarism, and conferences are the medium, slow and tedious perhaps, but in the final result more beneficial and lasting, replacing war. True, international conferences cost money, fairly large sums sometimes, but a mere bagatelle to the tremendous cost of war.

## A Costly Lawsuit

Customer Of Paris Underground Railway Had No Case

A lawsuit which lasted six years has just been concluded in Paris. The amount at issue was five centimes. Apparently, after a book of tickets for the Metro, the Paris underground railway, had been bought, fares were raised, and a supplementary charge of five centimes was demanded when one of the tickets was presented. The result was that this action was brought against the Metro. It has failed, after the plaintiff has spent sufficient in costs to have taken him round the world.

## Two Exceptions

An Irish magistrate, one of the old school, was summing up a case in a Dublin court. The plaintiff was a handsome woman, and her good-looking daughter was one of the witnesses.

"Gentlemen of the jury," said his honor, "everything in the case seems plain—except, of course Mrs. O'Toole and her charming daughter."

## Labor Wants To Earn

Bulk Of Unemployed Anxious To Do Something For Living

"Labor wants to earn its own livelihood," says William Green, President of the American Federation of Labor, in deploring the fact that more than 11,000,000 are unemployed in the United States.

Fortunately what Mr. Green says is true. One of the grave dangers of these days is that there is always a tendency that a group will arise whose members will lose all ambition and expect to be kept in ease and comfort by the state.

## Sure To Be Clean

An English actor appearing at a seaside resort for a week, had some difficulty in securing accommodation. In the end he was forced to consider very grubby digs.

Being a fastidious fellow he said to the landlady, "Are the sheets on my bed clean?"

"Lor' bless you, yes, sir," replied the woman. "The last gentleman as 'ad 'em, took 'is 'swim reg'ir every Friday."

## Troubled With Her Children Having Summer Complaint

Mrs. L. E. Montgomery, Ave. K. South, Saskatoon, Sask., writes: "I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were subject to attacks."

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint."

"Thanks to Dr. Fowler's I no longer dread the Summer months."

## More Divorces In West

Increase Is Shown In The Four Western Provinces

Divorce is decreasing in Quebec, Ontario, Nova Scotia, Prince Edward Island and the Yukon, but in New Brunswick, Manitoba, Saskatchewan, Alberta, British Columbia and the North West Territories it is increasing according to figures taken at the census by the Dominion Bureau of Statistics. There are in all Canada 7,441 divorced persons as compared with 7,401 ten years before. They numbered 4,400 in 1912, and only 661 in 1901.

The striking feature of the divorce situation in Canada is that in the old provinces with an older Canadian population, more homogeneous and with more of its population province-born, divorce has decreased. But in the newer provinces where there has been a larger percentage of incoming population divorce has increased. The most notable example of this is British Columbia where the proportion of those born outside that province is the greatest in Canada, the greatest increase in divorce has taken place.

The increase in British Columbia is 622 in a decade, or from 1,030 to 1,652. That increase is greater than the total increase in Canada which was only 40. Alberta coming second in the category of non-province born, increased 312, or from 102 to 1,014. Manitoba, which has a greater urban population than Saskatchewan increased from 506 to 603, Saskatchewan from 570 to 667.

The increases in the four western provinces was 1,178, while the decreases in the eastern provinces amounting to 1,138. Some of the difference, of course, would be due to difference in divorce legislation.

## Daring Flight Proposed

Piccard Plans To Make Balloon Ascent Over Hudson Bay Next Summer

Prof. Auguste Piccard, the only man who has looked twice upon the world from 10 miles above it, plans to ascend to the stratosphere again next summer from the northwest shore of Canada's Hudson Bay.

In some ways it would be a more difficult flight than the first two, for the winds blow across northern Canada might drop a balloon in wastes as dreary and inaccessible as anywhere on earth.

Nevertheless, as soon as the Belgian scientist has finished calculating results recorded by the instruments he will begin preparations for the third experiment.

"We plan to take off from the northwest shore of Hudson Bay, as close to the north pole as we can get," he said, recently. "Our purpose will be to complete the study of cosmic rays at a point where the lines of magnetic force penetrate the stratosphere. When we know how the rays act under these conditions we will have the answer to many scientific problems."

The professor said that he had risen nearly 55,000 feet, a point at which the temperature inside the gondola of the balloon was five degrees below zero fahrenheit, and outside 47 degrees below.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearances. Makes the skin rose-leaf in texture. Truly a peerless toilet requisite for every discerning woman.

## Windmills In England

Artist Discovers More There Than In The Netherlands

Windmill laurels are usually given to Holland, but facts are not in accord with popular belief. An artist of Gainsborough, in Lincolnshire, England, K. S. Wood, has discovered that England has over two thousand windmills and that there are only 1,700 in the Netherlands. Mr. Wood is now busy painting them before they disappear. He has done 200, and while he has been at work more than one hundred mills have been pulled down. Lincolnshire leads with one hundred and seventy windmills.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

## Trains Ignore Town

Although a college town, no trains bring students to Olivet, Mich., since the advent of the motor bus and automobile. No passenger trains stop here at all. Mail is picked up from the books. One freight train stops daily for parcel post and express.

## Soviet's Great Army May Threaten World

Two Million Soldiers Are On Active Service In Russia

Soviet Russia's army, officially numbering 600,000,000, has two million soldiers in active service and will be a threat to world peace within a decade, declares T. H. Oxnam, mining executive, with the Nevada Consolidated Copper Company, who has returned to the United States after directing vast operations for two years from his offices in Moscow and Leningrad.

"With an additional three million men in reserves, Russia within ten years will be able to throw into war as many as all nations had on the French battlefields," the engineer says. The country at present lacks great munition factories. For that reason it can't fight Japan or any other power. Stalin and his 26 co-directors are rushing industry with the main objective of building gigantic arms plants."

## Big Insurance Business

Appears To Be Still Lots Of Money Available In Canada

More than two hundred and fifty millions of new, paid-for, ordinary life insurance was issued in Canada in the first seven months of this year by 15 companies having in force 85 per cent. of the business. These figures, as reported by the Life Insurance Sales Research Bureau, constitute striking evidence of public confidence in the life insurance companies operating in the Dominion.

In the 12 months of 1931, payments of the life companies to policyholders in Canada and to beneficiaries under Canadian policies, as death claims, matured endowments, dividends, surrender values, etc., amounted to the sum of \$102,341,592. In addition, loans on policies were increased during the year by \$46,551,638.

## South Atlantic Air Mail Starting Soon

Planes Will Refuel From Ship Stationed In Mid-Ocean

The plan of the Deutsche Lufthansa for regular airplane service between Europe and South America has made such progress in recent months that the first test flights probably will be made early next year. A 6,000-ton steamer will be stationed in mid-Atlantic between Gambia, Africa, and Natal, Brazil, for a refuelling station.

The Lufthansa has shipped a Dornier-Wal flying boat of the type used by Wolfgang von Gronau on his trans-Atlantic flights to the Dornier works at Friedrichshafen to be equipped with the necessary instruments. A catapulting device with which planes will be launched from the refuelling vessel in mid-Atlantic also is under construction.

## Use Vacation For Study

Dutch Family Did Not Waste Year In Pleasure

During a year's vacation in Vienna, Austria, a Dutch colonial railway official and his family have been busy. The father studied decorative painting and musical instrument making. The mother and five children were awarded 24 certificates for music and technical studies. The mother also took up Viennese cooking, while one son mastered hairdressing. In addition the entire party learned German.

## Sky Is Always Beautiful

Like All Common Things People Study It Too Little

The fact that the shines every day with nothing to obscure it but clouds is much more wonderful than the eclipse. And the clouds, with their changing shape and color, are full of beauty, especially at sunrise and sunset. The fault is in ourselves, that we study the sky too little, and do not fully appreciate its beauty because it is so common and so easy to see, without smoked glasses.

## Village For Sale

On a board attached to a tree just outside the village of Aubepine, France, is a sign roughly painted, which reads "Village For Sale." The price asked is about \$30,000. The village has been completely abandoned, despite the movement, evident in many French districts, of a slow return to the country.

Grapefruit in a Park Avenue, New York, restaurant is 60 cents. But grapefruit aux marvelloux is 90 cents. This is grapefruit drenched with juice of half an orange.

Tri-motor passenger planes are to be operated between Berlin and Moscow, half being of German make and half Russian.

## Introduces New Trade

Mattress-Walker First Of His Kind, Does Good Business

A macadam road and a first-class mattress have one thing in common. But only one, of course, if the mattress is really first class.

It is, The New Yorker tells us in an editorial note, a slight crown in the middle; and out of this crown a slightly bald man named Harmon Rumzic has built an unusual career—mattress walking.

This crown, or ridge, The New Yorker tells us, "is to prevent the mattress from developing as time goes on, a gully or gulch where the sleeper's body rests." A certain lady, ignorant of this, became instantly suspicious when she received a custom-built mattress into her home the other day.

"Seeing a bulge down the middle, she thought something was wrong, and phoned the makers of the mattress to send right over." Continuing the story:

In an hour or so, Harmon Rumzic arrived, pulled the mattress on to the floor, covered it with burlap, took off his shoes, and began solemnly walking up and down on the mattress.

This prank delighted the lady and she took off her own shoes, thinking to join in. Mr. Rumzic discouraged her. He takes his work seriously.

No jumping up and down, nothing but the steady tramp, tramp, tramp, furling after furling till the mattress is level.

A furling is one-eighth of a mile. Mr. Rumzic is the only mattress-walker in the trade, says The New Yorker, as it proceeds with its account of this remarkable vocation.

He does walking in addition to his other regulation work. It would take two or three weeks of steady sleeping on a mattress to wear off the crown that Harmon Rumzic can walk off in an hour or so.

He gets two or three calls a month to go mattress-walking—more calls in summer than in winter, more calls in November than in any other month. He calls his visits "sittings."

Sometimes one sitting is enough to level off a mattress, sometimes he has to go back. He walks two or three furlongs at a sitting.

## Adopt Uniform Type For Braille Readers

Anglo-American Agreement Means Wider Selection Of Books

Even the blind are wildly fond of mystery novels and detective "thrillers," according to officials of the National Library for the Blind, who have just announced the details of an Anglo-American agreement for a uniform type for all Braille books. It means that American and English blind persons henceforth will enjoy a wider range of books from which to select.

Detective stories, American crime stories, will be the chief importation of Braille books into England, it is expected. Library officials say that blind readers have a great variety of tastes, but detective stories are the most popular.

Three blind American delegates travelled to London to arrange the final details: R. B. Irwin, executive director of the American Federation for the Blind; G. F. Meyer, president, American Association of Workers for the Blind; and L. W. Bodenberg, Illinois school for the blind.

## Permit Is Required

Railway Constables Check All Trains Going To Churchill

Going to Fort Churchill, the terminal point of the Hudson Bay Railway, is like a visit from Windsor to Detroit. Railway constables go through all trains en route to Churchill and ask to see the permits of the passengers. Instead of the familiar greeting, "Where were you born?" of the United States immigration men, the traveller to Churchill hears, "Permits please!"

A few hardy souls have tried to get up north without the necessary permission. But most people realize how unpleasant it would be to be stranded at Hudson Bay. It is just as well the Government exercises close supervision. The officials have enough on their hands trying to make things go in Churchill, without being burdened with the problem of looking after a few hundred men who made their way north and had neither means of subsistence nor prospect of return.—Border Cities Star.

## Valuable Bird's Nest

At Crater Lake National Park, the discovery of a "camp robber," or Oregon Jay nest, has caused a stir in ornithological circles. So rarely are they found that an eastern ornithological society has posted an award of \$100 for the location of such a nest.

## An Oasis Of Beauty

New Park In The Cypress Hills Of Saskatchewan

The motist on the south road out of Maple Creek, Saskatchewan, climbs 1,800 feet to the newly created Cypress Hills Provincial Park, an area of eighteen square miles of pine covered hills that lies twenty miles south of the town. Here have been established by the government a forest reserve and game sanctuary. The streams are clear and cool, well suited to the rainbow and Loch Leven trout fry placed in them some years ago. As a result of the wars between the Crees, Assiniboines and Blackfeet, this area became a "No Man's Land," was little hunted and became a haven for wild life, and to this day it has been a favoured spot. The traveller is hardly aware of approaching the park, until suddenly topping the crest of hills there breaks into view a beautiful scene of forest and stream. It is truly an oasis of beauty, located in the Cypress range of broken hills, scarred with deep ravines, fantastic crags and rounded elevations.

Dams placed in Belanger and Lone Pine creeks, tributaries of the Frenchman River, which loses itself across the Montana border, have created two charming lakes, 4,000 feet above sea level, known as Loch Lomond and Loch Leven, having a water area of approximately 200 acres. In addition to rustic bridges that punctuate the woodland paths in the new park, there will be found accommodation for the vacationist that includes splendid camp sites, a sixteen room sleeping building, and a nearby kitchen house.

## Perils Of Motor Fatigue

Great Risk Of Accidents When Driver Is Drowsy

Regulations now demand that drivers of motor trucks shall remain on duty for only a certain period of time, so that there may be less risk of them falling asleep at the wheel and bringing injury to themselves or others on the road. This is a sensible provision, the full force of which is revealed in the number of highway accidents directly traceable to fatigue on the part of drivers, and if it were possible for operators of private motor vehicles voluntarily to adopt the same rules, there is no doubt whatever that there would be a marked lessening in the number of traffic accidents. Safe operation of motor vehicles necessitates unceasing vigilance on the part of driver. It cannot be carried out without great risk, especially on much-travelled roads, if the driver even nods at the wheel. And if he is so overcome with fatigue that he falls asleep, the consequences may be (and very often are) most disastrous.

## Ex-Kaiser Owns Church

Title To Property Has Been Held For Many Years

Former Kaiser Wilhelm owns a church in North Bohemia. When the 75th anniversary of the German Evangelical Church of Marienbad was observed a letter of congratulations came from Wilhelm at Doorn. He made the pastor of the congregation a member of the Order of Hohenzollern.

There are two valuable windows in the church. These were presented by the Kaiser on the 50th anniversary of the church 25 years ago. Wilhelm was the exalted ruler of the German Empire at that time. He has held title to the church property for many years. That he still keeps in close touch with affairs is indicated by the letter sent the congregation for the anniversary.—London Daily Express.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

## Luxurious Car For Boy

Built To Order For Young Son Of Indian Prince

What is described as the most luxurious car ever built to order for a boy has been completed in England for the eleven-year-old son of an Indian prince, the Maharajah of Johpur. Beneath the hood is a four-cylinder motor that will drive the car 74 miles on a gallon of gas. The miniature seats, as well as the steering wheel and controls, are boy-size. In all respects save one the car might typify the fondest day dream of an average boy. The Maharajah has ordered special gears installed that will limit the driver's speed to 15 miles an hour.

## WOMAN LOSES 28 lbs.

Trips Upstairs Like a 2-Year-Old

A woman writes:—"Three months ago, after much argument, I was persuaded against my will to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. After three weeks of Kruschen I had lost 5 lbs. 4 oz., and I felt five years younger. I really must say I feel a different woman. My age is 37 years. I have now lost 28 lbs. to date, and while before, to go upstairs was a great effort, now, as my husband says I trip up like a two-year-old."

—(Mrs.) S. G. B.

Kruschen Salts keep the system free from encumbering waste matter. Unless this wastage is regularly expelled it will give rise to rheumatic and other body poisons. And Nature is liable to take the defensive measure of storing this poison-breeding material out of the way in the form of fatty tissue. Unlike most salts, Kruschen is not merely a laxative. It is a combination of six salts which have a tonic influence upon every organ, gland, nerve and fibre of your body.

## Reward Wheat

Is Finding Favor In A Number Of Saskatchewan Areas

Reward wheat is finding favor in an increasing number of Saskatchewan districts according to Prof. J. B. Harrington, professor of field husbandry at Saskatchewan University. Several farmers on the heavy soil north of Moose Jaw report better yields from Reward than Marquis.

At Krydor, R. Ramsay, extension worker of the University of Saskatchewan, found that Reward wheat was replacing Garnet in favor. The Garnet wheat had lodged badly and shows considerable rust this year, particularly in the lodged spots. The Krydor district had a heavy crop and cutting was well advanced.

Dr. Harrington has returned from a trip of 1,800 miles in the province chiefly undertaken to compare tests made of Reward wheat and Marquis wheat grown side by side at a number of points in the province.

## A Colony Of Dwarfs

Everything Built On Small Scale In Suburb Of Berlin

In a southeastern suburb of Berlin a colony of some fifty dwarfs has established a miniature town. Everything for the little people is on a small scale, "small houses with small rooms filled with small furniture. The inhabitants are mostly stage folk. They have recently received official recognition of their village by the postmaster-general. He has given authority for the building of a small post office to be called Zwergstadt, or Dwarf City. The midget citizens have planned their tiny houses not only for their own comfort, but to exclude persons of normal height.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

## Logical Deduction

An admirer describes an actress as "having teeth like stars," which causes The St. Thomas Times-Journal to remark that "lots of us have molars that have been coming out at night since I don't know when." Anyway, it is an interesting comparison, and if teeth are really stars, perhaps the milky way is just some kind of heavenly toothpaste.—Toronto Star.

Datemper reseponds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

## Ahead Of Dominions

It may amaze some people to learn that the value of the output sold off the farms of the United Kingdom exceeds that of agricultural production in either Canada or Australia. For the average pre-depression year, it is estimated by a writer in the London Times at £300,000,000 as against £275,000,000 in the Dominions mentioned.

The nest of an American eagle weighs from 10 to 12 pounds.

# HOW TO GET 66 2-3c FOR YOUR WHEAT

The Gleichen Call will pay 66 2-3 cents per bushel for Wheat (Basis No. 1 Northern) at your elevator. It is hardly necessary to explain that this offer is made to enable the Call's subscribers to pay up their arrears at a rate on the dollar commensurate with the current price of wheat. The plan, the Call believes, will be widely acclaimed as very generous and fair.

**THE 66 1-3 CENTS PLAN APPLIES TO PAYMENT OF ARREARS; ALSO NEW SUBSCRIPTIONS**

On any transaction in connection with NEW or RENEWALS or on OLD ARREARS account, A BUSHEL OF No. 1 NORTHERN WHEAT will be accepted at the value of 66 2-3 Cents. Lower grades will also be accepted on this basis.

Credit will be given at above rate, upon receipt of graded storage ticket made out to the credit of the Gleichen Call—we do not accept a wheat settlement on any other basis.

Subscriptions For More Than One Year In Advance  
Cannot Be Accepted Under This Plan.

**The Call,  
Gleichen,  
Alberta.**

## Town & District

Addison Wilson has returned to the university where he will spend his last year studying medicine. When Addison graduates next year, he will be the first Gleichen born boy to practise medicine.

Mr. and Mrs. J. Black entertained Mr. and Mrs. E. J. Garland and Mr. and Mrs. H. Ruppe and daughter of Tudor, after Mr. Garland's speech on the Imperial Conference on the 27th inst.

Mrs. P. Downey accompanied her son Peter, to Edmonton last week where he has entered the university.

The world series baseball games had most Gleichen people interested especially those who put money in the local sweepstakes each day. The games should have been played in Gleichen for the weather here was ideal.

What do you think of a man who will at the table, tell the Lord he is thankful for the things before him, but as soon as he says "Amen" will begin storming about the cooking.

Speaking of advertising: There is no business that cannot be increased and benefited by advertising. No class of advertising pays as well as a well written newspaper ad. There is no work you could do that would bring you as great returns as to use business.

Hugh Beach, who during the past summer has been on the geological survey, spent a couple of days visiting his parents, Mr. and Mrs. T. H. Beach before returning to the university at Edmonton.

Miss M. Stubbs and Gerald Yates have left to attend Mount Royal College at Calgary.

The bridge parties in aid of the rink staged every week, in the hall, are very well attended. About forty people attend each game.

Mrs. Edgar Halsey of Winnipeg sister of Mrs. Ensign Sutherland has been visiting with Ensign and Mrs. Sutherland, officers in charge of Eventide Home.

J. Cusack of Calgary, was in town last week organizing the "Economy League" under the auspices of Mr. Douglas of Calgary, who ran as Conservative candidate for Gleichen constituency some few years ago.

Two young silver foxes escaped from Mr. Nicholas fox farm Monday. One was captured in the yard and the other was shot by Stan Haskayne.

Necessity seems to have mothered the invention of an entirely new type of paper shoe. When a motorist sought a Gleichen tire shop for repairs the attendant was surprised to find that the blown-out tire harbored a folded newspaper instead of the usual inner tube.

The hockey boys are putting on a dance in the hall, Friday, October 28. At this dance the boys hope to recoupe their treasury to enable them to purchase some much needed new equipment.

A big truck carrying 36 drums of gasoline left a number of them scattered along the main highway one evening lately. The braces holding the drums on board broke and allowed the drums to drop off here and there while the driver continued merrily on his way. Scotty McConnell spent a busy evening picking up the stray drums.

Mr and Mrs. J. Wodel of Calgary, spent Sunday visiting Mrs. W. P. Evans.

"This is a practical demonstration of the saying that every man ought to have his name printed on his envelope," said the postmaster pointing to three or four letters on which there are no postage stamps. "Any man is likely to put a letter in the post office without the stamp on it. With a card in the corner of the envelope, we can hold it and collect the postage when the writer comes in. This saves the person to whom the letter is addressed from paying extra postage and you know how it feels to be called upon to pay postage on a letter sent you."

**UNITED CHURCH**  
Rev. V. M. Gilbert, Minister.  
Thanksgiving Sunday, October 9th.  
11:00 a.m., Church School.  
7:30 p.m. worship. Special Thanksgiving music and address.

## SCHOOL FAIR PIRZE WINNERS

## Recipe for Making Men

**Ingredients**  
One red blooded boy  
Parents' loving care  
Outdoor exercise  
Some study (not too much)  
Reasonable amount of work  
Good food (plenty of Robin Hood bread)

**Method**  
Mix work and play with study. Combine wisely under direction of loving parents. Add muscle building foods... plenty of bread made from Robin Hood flour. Rear with patience and understanding. Turn out at 21, a credit to parents. This recipe makes one man.

ONLY a mother knows the painstaking care required to raise a boy. She bears the responsibility of educating him and developing his body from babyhood so that he will be equipped to make a comfortable living. In times like these, mothers have to sacrifice in order to give their children the advantages of a normal youth. They cannot slight the mental and moral training of their children, nor can they handicap the child through lack of good nourishing food. Since bread is essential, smart mothers know how foolish it is to economize on flour when even the best is inexpensive.

Prairie mothers have considered Robin Hood flour the Standard of Excellence for more than a generation. It remains today the flour in which you can put your trust. Robin Hood is CLEAN, PURE and of highest food value. It is the safe flour to use "for making men."

## STUDY THIS PICTURE— THEN THINK

The difference in cost between CLEAN, PURE Robin Hood flour, and CHEAP, poorly milled flour is only 1c PER DAY FOR A FAMILY OF FOUR.

Little Alice had a very bad cold. Holding up a rose to her mother's nose she asked: "Does it smell sweet, Mummy?"

"Yes, dear," the mother answered. "Can't you smell it yourself?" Alice shook her head solemnly. "No, she said, 'my nose is deaf.'"

## In Union There Is Strength

In hard times as well as good times  
Alberta Farmers should work and act  
together.
